YEAR BOOK
OF THE
MEDICAL COLLEGE
OF VIRGINIA

X-RAY
1941

PUBLISHED BY THE STUDENT BODY
The Medical College of Virginia once again pays a worthy tribute to the memory of one of her magnanimous graduates, who emerged from her halls in 1853, with all the hopes, aspirations, sympathy and understanding characteristic of the embryonic Doctor.

William Latane was a product of the formative period which was developing these United States, and proceeded from a race of men whose characters were affected by the calmness and serenity of rural life. He had no superior socially, coming to manhood with unhurried development of character, not feverish or hysterical, but reflective, calm and strong.

About his patriotism we know much—about his
professional career we know comparatively little, as personal data is limited. There is, however, a record of his having received a Doctorate Degree from the Medical College of Virginia. Yet, in either case, we know that he benefited his community and country more substantially than others of possibly greater renown, being possessed with vision, energy and delicate perceptions. His undaunted courage, and alert mind compassionately filled with deep regard for the dignity of wholesome living, made him a physician who, in reality, was a community institution himself. So solicitous, so eager for its welfare, its sanity, health and its propriety, and so willing was he to believe in what he had been taught, that his career was undoubtedly an ultimate success. Life for him never seemed to have lost its morning vigor and freshness, because he drew freely from the wells of living and learning, and gave his best to those he knew and loved.

The crucible of the War Between the States found our nation in a nebulous state of affairs. William Latane cast his lot with his native state, Virginia, and became Captain of the Essex Guards. He fought valiantly until he was killed in action, June 13, 1862, on the road between Hanover Courthouse and Old Church, when Stuart’s cavalry made a raid around McClellan. This hero was the only man killed in the skirmish on the road, and was buried under an old cherry tree in the Page burial ground. Today he lies quiescent in the same spot, and a shaft has now been placed over his remains by the Daughters of the Confederacy, with the following inscription:

“William Latane
Captain Co. F. Essex Troop 9th Va. Cavalry C. S. A.,
killed in action June 13, 1862. A brother bore his body
from the field, and a woman’s voice read over the
hallowed dust the ritual of the dead.”

It is, therefore, the soldier that we know best, because of the recorded facts, and this is enough to make him an enviable personage in the great line of characters whom the Medical College of Virginia has trained.

His burial has been made famous by a painting of William D. Washington, himself a confederate soldier, in which he depicts the burial at eventide, the grave surrounded by the families, and slaves, returning to Mother Earth the remains of this young hero. From this picture was inspired the poem by John R. Thompson, which we give in part:

“But woman’s voice, with accents soft, and low,
Trembling with pity—touched, with pathos—read
Over his hallowed dust the ritual of the dead.
“Tis sown in weakness, it is raised in power...”
Softly the promise floated on the air,
While the low breathings of the sunset hour
Came back responsive to the mourners’ prayer.
Gently they laid him underneath the sod,
And left him with his fame, his country, and his God.
And so, Vitrix et Vultus, the conflict done. Thou the
late lamented Latane”

William Latane’s Doctorate Degree
Academy Square
Foreword

It is a long span of years that covers the distance from "Quincy's Academy" to the newly opened twenty-story Medical College of Virginia Hospital that now dominates Academy Square, Richmond. The location of this historic spot is the block lying between Broad and Marshall Streets and running east from Twelfth Street to College (Fourteenth) Street.

History tells us that within this area and near Twelfth Street on the 24th of June, 1786, the corner stone was laid for a large frame building which was to house the Academy, the dream of one Chevalier Quincy de Tourpierre, an enthusiastic French veteran of the American Revolution. Mr. Quincy, in establishing the Academy of Sciences and Fine Arts of the United States of America, had hoped to develop it into a great university of the arts and sciences. However, after two years the "Founder-President" returned to France and the educational venture vanished into thin air.

The convention of 1788 which ratified the Constitution of the United States, finding that the "Philistin Building" located in the lower part of Capitol Square was too small to accommodate the assemblage, arranged to adjourn to the Academy Building, and it was there that the historic event took place.

The frame structure which had become the center of theatrical and historical interest was destroyed by fire in 1852, and to take its place a brick theatre was built at the southeast corner of the square on the exact spot now covered by The Monumental Church, which, sad enough, met a similar yet more tragic fate.

From the ashes of this conflagration rose a glorious monument which stands today as an emblem of the tragic event, devoted to the service of humanity for the years to come. On the day after the fire the Common Hall, as the Richmond city council was then called, ordered the city to purchase the theatre site, "to be consecrated as the sacred deposit of the ashes of the victims and enclosed within suitable walls of brick," which became "The Monumental Church to be forever kept sacred for the purpose of divine worship." The church was finished in two years and opened its doors for the first service on May 4, 1854.

To return to Academy Square, we find that the medical department of the Hampden-Sydney College (some nine years later to be known as the Medical College of Virginia) was interested in this location, had acquired some of its property, and had erected its first building on the northeast corner of the square. In 1843 the college took up its quarters in this new edifice which faced on College Street. The beautiful building was designed in Egyptian architecture and had as its builder Mr. Thomas S. Stewart of Philadelphia.

Side by side these two buildings, The Monumental Church and the Egyptian Building of the Medical College dominated the life of the square, which had originally been dedicated to the art of learning. Now these institutions were dedicated to the art of healing, the one to the healing of men's souls, the other to the healing of men's bodies.

Through these years the College has expanded on Academy Square with the erection of the Dooley Hospital for Children and Cabaniss Hall for nurses on Broad Street. Then some years later the attractive Clinic Building was built on the corner of Marshall and Twelfth Streets, but it was soon overshadowed by the tall and magnificent hospital which has just opened its doors to suffering humanity. With the erection of the hospital every foot of Academy Square is owned and used by either the Church or the Medical College for the purpose of healing the souls and bodies of mankind.

THE SCHOOLS

Medicine, Dentistry, Pharmacy, Nursing
EDUCATION should be continuous from birth to death; school days cover its more formal aspects, constituting the best arrangement yet devised for compressing into a minimum period experiences which would require many more years if dependent upon the more informal procedures of education. However, informal educational opportunities should not be slighted in the least even during college days.

In a professional institution like ours the values accruing from the more informal aspects of educational opportunity should in my judgment be as fully developed and as fully appreciated as in any other educational agency.

To neglect such influences as music and the other branches of the fine arts, recreational reading, an opportunity to meet leaders in all fields, even those remote from health service emphasis, or to miss liberal contacts with one's own fellow-students and teachers outside of class, represents educational wastage of the first order, one likely never to be recovered. On that account I am personally most eager to give our student body every valid informal educational opportunity. This will enrich life and make the memory of professional school days one of the most treasured.

A substantial cultural advance here can be made by developing facilities for physical recreation which is basic, a new-type housing system for both the student body and certain faculty members, a student activities centre and gymnasium supplemented by a positive program of utilizing such facilities and others in the fullest possible way not alone for comfort, health, and happiness, but running through it all constructive informal education highly personalized. Just when and how these ends can be achieved cannot be stated; yet it is believed that with good planning, diligence, and co-operation substantial progress can be made.
BOARD OF VISITORS

Stuart McGuire, M.D., LL.D.
Chairman

Robert T. Barton, Jr., B.S., LL.B.
Vice-Chairman

J. R. McCauley
Secretary-Treasurer

E. Louise Grant, B.S., R.N., M.S.
Professor of Nursing
LEE E. SUTTON, JR., B.S., M.D.

With grateful hearts we, the members of the Senior Class in the School of Medicine, pay tribute to a renowned clinician, a noble teacher and a beloved dean.
Senior Class History

IN SEPTEMBER, 1937, we enrolled in the first-year class of the medical school fearful and yet eager to become doctors. We were fortunate in that as our work expanded and developed, our field of knowledge, the school around us, grew...a building a year.

1937-1938: We plunged into Anatomy a little tremendously but with assistance from a man who had faith in the work, coupled with infinite patience. Our knowledge grew as we gleaned from Bacteriology and that Sponsor of Hokum new information. We saw through the microscope the marvelous structure of cells and learned to differentiate them. We studied Physiological Chemistry under a professor who lightened lecture hours with perpetual good humor. And around us, the clinic building was completed and became a part of our institution as the Medical College of Virginia completed its centennial year.

1938-1939: We stepped forward with a more confident bearing to find our tasks entirely new and fascinating. We studied bodily processes, changes in the human being in disease and the helpful and disturbing effects of different drugs on the body. We observed physical signs and symptoms and began to couple them for symptom complexes. And around us, the new dormitory for men was made a home for medical students who worked in the nearby hospitals; remodeling was begun on McGuire Hall and the Egyptian Building; and the ground work on the new hospital was begun.

1939-1940: We began to use our knowledge, to study patients in addition to disease. Our work in the hospitals was illuminated by lectures from the many clinical men and we began to know a small bit of the enormous opportunities open to the man who has an educated mind. We punctured veins, we saw babies delivered, we saw operations and we did an abundance of laboratory work. And around us the new Egyptian Building was completed. The Barach Auditorium with its unique beauty was the center of a building which contained well-planned Bacteriology and Pathology units.

1940-1941: As we enter our last year, we see more clearly the wide expanse of knowledge ahead of us. We are actually needing the information taught us in the past few years. From the first week when we swallowed hard over bones and stiffs to learn, until now, when we are allowed to hold retractors in the operating room, and deliver babies on the outside, we have learned facts that are important. And around us, the great achievement of this time is built, the new hospital of the Medical College of Virginia. We are privileged to show visitors through this well-planned, well-equipped, seven hundred bed hospital, this hospital in which we will be the first Senior Class to work.

We look back of this great institution’s advancement through the past four years. We have lived in the age to know and appreciate the men and women who have made it an outstanding achievement. We feel as we leave this place with a doctor’s degree that our greatest challenge is to so live that our work can reflect the privilege that was ours.

Junior Class History

Juniors... that magic word is attained at last! No more awkward freshmen, or “just the sophomores.” We have quelled the monster, Chemistry, which so beset us three years ago. We have profited by Dr. Osterud’s teachings, both anatomical and otherwise.

The sophomore year threw us into a “physiological state,” which left us at such a low level that, by the time we reached the second semester, we couldn’t tell a cadaver from a physiology frog.

With the advent of the second semester came Dr. Haag, bow tie, cigar and his roll book. Those were the days when fear and trembling descended on all during the first half hour of the lecture period. Our small dip into the sea of medicine and surgery stimulated us somewhat, and we managed to struggle through examinations, but only with subdued spirits.

Last fall we came back to school eager to try our hands at real clinical medicine. We were a little discouraged when we discovered our mission in life was to find the hidden mysteries in the art of urinalysis and the possibilities of a complete blood count.

Gradually, while searching for the beauty in a well-written history and an inventory by systems, each one of us acquired those little mannerisms which, when added together, gave that indefinable something called the “bed-side manner.”

Long hours spent on O. B. assisting in delivering babies in all conceivable positions, marred somewhat our trust in this newly acquired “bed-side manner.”

Hours of sleep lost by each as he pored over “Cecil,” in an effort to determine if ever there was a disease not complicated by nausea and vomiting, saddened our outlook—but only momentarily.

We were proud to be a part of the opening of the new Medical College of Virginia Hospital. This was really a new milestone in the onward journey of M. C. V. as she stands on the threshold of mighty achievements. Her future is also rich in promise.

Naturally we think we know more medicine than most seniors are given credit for knowing. Yet, we too will be seniors next year, and then we will realize that our overrated concept of our abilities was due perhaps not to any positive virtues of our own, but to a deficient knowledge of the gaps in our training.

Therefore, we await with interest our senior year, and with a confidence well-restrained.

Sophomore Class History

Our story goes back to our dear old Hokum days when our lives were a grand mixture of flasks, brunettes, dead cats, and campus queens. Somehow the years passed and we are now Seniors. That year begins with extensive correspondence, and soon your roommate slyly begins to discard treasured catalogs and application blanks. January comes—your choice is made, and the mails become the source of a mild hypertension. At last "The Letter" arrives, and you announce as casually as possible, "Oh yes, I'm going to be in Richmond next year. Look me up."

Then your first year at medical school begins. You are a member of the Class of '43, but definitely. Your self-importance those first two weeks is exhilarating indeed, but alas! the upperclassmen arrive and life takes on a more somber hue. Somehow, you and Dr. Osterud pull through, but you can't quite realize it for several weeks.

The Sophomore year you begin with great assurance. At last you have reached the greatly cherished position of Freshman Advisor. This period of elation quickly passes. It is simply "blacked-out" as a "Illitz" of Physiology, Pharmacology and Pathology. Your sleep is disturbed. You see cute little mice scampering hither and thither, which is pleasant enough, but next comes the agonized yowl of a dog through which you hear a soft voice murmuring, "Miss-ter Sickly, Miss-ter Sickly, what is an elixir?" You wake up, and with horror contemplate the sad fact that you haven't opened Bowl for the past three weeks. Then you pass on to more pleasant thought that your basketball team has actually won the championship—and from the Juniors, too.

Later on you are smitten with added worries. Your lymph nodes are enlarged; they really are. You dash home and leaf through your personally autographed Physical Diagnosis book. "Oh, here it is! Wonder whether it's tuberculous or Hodgkin's disease?" You can't tell whether the darn things are discreet or not. Well, that's another trip to Dr. Baker.

The entire month before exams is devoted to study, but dedicated to worry. Between times you wonder just how people really get to be Juniors anyway. Now you are troubled with gastro-intestinal upsets, and you don't know whether it's the exams or that last party. Finally your worries are removed one by one, until only the one remains. Now you sit back and think how pleasant it will be at home—explaining that you really aren't a magician after all, just a medical student.

SOPHOMORE CLASS
SCHOOL of MEDICINE
Freshman Class History

FUTURE embryos, cocci, and bacilli, to say nothing of bones, brains, and tumors, were given notice to beware when the class of '44 started its life together, for among the seventy-one "Eds" and nine "Co-eds," a few were destined to become the Pasteurs and Listers of their generation. Even though thirty-seven colleges were represented, the majority of us will remember dear ole "Meatball" as our symbolic alma mater.

In the next few weeks we learned, and sadly so, that our presence was not always welcomed beyond the confines of M. C. V. Our friends did not appreciate the peculiar aroma which permeated the air around us.

None of us will ever forget the formal opening of the Medical College Hospital, nor the tired, blistered feet which were the result of this occasion. There can be no doubt as to the success of the opening which will be more fully realized in the years to come.

We have burned our share of the midnight oil over Anatomy and Biochemistry, to say nothing of the endless hours spent dissecting "Ole Man Mose." However, "at this stage of the game," we are hopefully looking forward to returning for our Sophomore year.

Our history would be far from complete if we failed to mention our sincere appreciation of the untiring efforts of our professors. Also, we deeply regret the death of one of our classmates, Sidney Kantor.

SCHOOL of DENTISTRY

OLIVER WENDELL CLOUGH, B.S., M.S., D.D.S.

Our sincere appreciation to one whose patience and understanding have won for him the admiration, respect and good will of the entire school.
WE, THE CLASS OF 1941, have much to look back upon during our dental education at the Medical College of Virginia. During the years of our stay, we have collected memories, which we shall cherish throughout our lives, concerning each of the years through which we struggled and finally passed.

In our Freshman year we spent many weeks trying to adjust ourselves to our new surroundings and friends as well as endeavoring to thoroughly learn the basic principles and theories of dentistry and related sciences. After many months of struggle, we finally found ourselves in a class that became more interesting and educational along dental lines—we became an intellectual genius—a Sophomore.

The Sophomore year will always remain a vivid memory, in that we first tried our hand at operative procedures, as well as crown and bridge, and thus got our first taste of what was to follow in our next two years. Here we also became acquainted with the many bugs and diseases that we were to be associated with so long as our interests were along scientific lines. But on we went to the befuddled Junior Class phase.

In our Junior year we had our first true experiences with Mr. J. Q. Public to whom we are striving to devote our lives and energies for the advancement of the dental profession; and that we may be of a greater service to mankind.

At last our goal has nearly been reached and, as we near the end of our four important years, which is the dawn of our dental career, we realize that our search for knowledge and ability has not ceased, but only begun.

To the faculty and staff, we the Class of ’41 wish to express our sincerest and deepest appreciation for their untiring efforts, patience, devotion and understanding, that we may each be better equipped to serve humanity on a higher, more ethical and more scientific basis.

So as we come to the close of our sojourn here, it is with reluctance and sorrow that we take our leave. Our sincerest hope is that all our friendships and ties at M. C. V. will be renewed often and will remain until the end of time.

Junior Class History

In the fall of 1938 the Class of '42 started on a long journey. The sun was sinking and the sky was rosy, as thirty-four members began the journey. We were fortunate in having an excellent faculty for guides.

When we started carving teeth, dissecting cadavers, etc., we found we were in the darkness of night. Some members became discouraged and turned back, but the class marched on in darkness. Anatomy, Biochemistry, Oral Anatomy, and Prosthetics were great barriers, and they took a toll of six men.

Before starting the second lap of the journey, we picked up four new members which made a total of thirty-two. We were still in darkness and encountered new barriers in Physiology, Pathology, Operative Dentistry, Crown and Bridge, and Bacteriology. However, our guides led us through these obstacles, losing only two men.

We started the third part of the journey with thirty determined men. By utilizing our past experiences, we are overcoming the difficulties we encounter in the clinic.

We have kept our perspective; the horizon is growing brighter, and by June, 1942, we are hoping that the sun will be shining on our class of thirty members.

JUNIOR CLASS
SCHOOL of DENTISTRY
Sophomore Class History

'Twas a balmy day of September 17, when the first practice of the season was called. Seven men having graduated, a squad of only thirty-six men reported. Head Coaches Fee, Mohart and Simpson, and Assistants Eastman and Milton, stood dressed in white and cast doubtful eyes. With the shrill of a whistle, Coach Fee faced the men and said: "Boys, we have a tough season ahead of us. This year, more work in lab and less skull practice. Make a scholastic average or the Army can have you."

Then the boys begin to limber up—oiling contra angles, winding arms of casting machines, turning cart wheels on lathes, and chin ups on arms of Foreham engines.

Then the first scrimmage—men in uniforms of brown, which fit as snug as a Class 2 inlay. The boys use a Pathological swing with Metric and Apothecary formations. Amidst enamel and ivorine dust such plays are executed—end runs like marginal ridges of 3/4-crowns; off tackles with Mesio-distal contours; blocks as hard as acrylic resin; tackles as low as gingival margins.

The boys are tired—a pickling jar is used to polish them up. Wiping their faces in rag wheels of rouge and tripoli, the boys job off the field knowing that the prelims are over and that the better half is yet to come. And so into the shower room for a slight change of equipment, with the future schedule containing tougher opponents, with many trick plays to control and master.
SOPHOMORE CLASS
SCHOOL of DENTISTRY
Freshman Class History

WHEN we pilgrims, the Class of 1944, disembarked from our leaky ships of knowledge on these foreign shores, we were uncertain as to our fate.

We had sailed to a place on the sea of higher education. Those behind had told us of the strange beasts and savage tribe headed by one who reigned with an iron hand. As these stared at us, fear came into our hearts. We were given thick books from which we were to gain knowledge. A leader was chosen and we set out to overcome our foes.

Most of us survived the innumerable tortures, these having been greatly reduced by the reception given us by the Delta Sigs and Psi O's. Each day we blazed further into the forest of knowledge. Every man did his share of the work and we never gave up.

We battled against carving egg-shape bicuspid, thick "plates" and polishing through them, Anatomy and Biochemistry, which almost ruined many of us. Some learned how to wield a hot spatula, mix plaster, recognize "fool proof questions," and open lockers the first time. Our success was condemned by the wickedly grinning Sophomores.

We advanced by working together, and with our faculty adviser, whose hope and interest was to see each of us make good.

We have now completed our first voyage. The history of our class has only begun, and now we board our ships once more to sail on. We hope our work has been done well, and in a way that it shall be the hope and ambition of those who follow us to uphold the ideals and aims, which the Class of 1944 has tried to do.

A typical portrayal of an old pharmacy or apothecary shop depicted here at M. C. V. during a recent convention. It proved unique, creating a great deal of interest in our predecessors' modes of administering to the sick.
Some Modern Pharmacy Student Travelers

To facilitate a wider concept in the world of modern pharmacy, the students in the Pharmacy School at M. C. V. traveled off to gather in the knowledge and doings of the world about.
In Memoriam TO

DR. W. G. CROCKETT

EVERY MAN, whoever he be, has his own philosophy with which to answer the problems of life. Some would meet the day with forward living, others would shield themselves with cautious restraint; and still others would face the world with full-hearted love and the serenity of gentility.

Among the latter was Dr. William Goggin Crockett, Professor of Pharmacy since 1920, who, October 29, 1940, passed into the sleep that men call death, and left his place on our campus silent beyond recall.

To all that he undertook—on the campus or off—Dr. Crockett brought this understanding gentility. His work was a monument, built of men who had become great through his teaching.

As a scholar he was nationally renowned. He was graduated from Hampden-Sydney College in the class of 1908 and later finished in Pharmacy from Columbia University, receiving his Master's degree from New York University in 1917. He was granted an honorary degree of Doctor of Science from Hampden-Sydney in 1939.

His profound knowledge of science made him an outstanding authority in the field. In 1916-17 he served as an assistant in the Chemistry department in New York University and then entered the Research Division of the Chemical Warfare Department, American University Experiment Station, as a First Sergeant. He was also associated with the Chemistry Departments of E. R. Squibb & Sons, and E. I. du Pont de Nemours Company in Wilmington.

He was a former President of the American Association of Colleges of Pharmacy; a member of the American Association of University Professors, American Association for the Advancement of Science, American Chemical Society, American Pharmaceutical Association, and of the Revision Committee of the United States Pharmacopoeia as well as a member of the Virginia Academy of Science.

He belonged to Phi Kappa Alpha, Kappa Psi, Rho Chi, and Sigma Zeta fraternities, and also the Masons.

Those who as students and friends knew and loved him can only feel that something, someone irreplaceable, is gone. The hours we spent with him, though they cease, are for today and tomorrow. They are hours which will live and grow in the hearts of men who cherish them.

The sun which once shone so brightly lighted the fullest stature of a man to his last sleep. Today in the Great Unknown, whoever, whatever it be, a gentleman has his final triumph, smiling gently and understandingly in the sun of the Everlasting.
His thought and consideration of our every problem made it a privilege to be his student. He was one who loved and was loved by his fellow-man.
Senior Class History

Our Class of '41 had its beginning in 1937 when we came to the Medical College of Virginia full of ambitions and desires. With the constant thought of rendering a professional service to our fellow-man, we entered into a year of readjustments and a year so different from anything we had previously experienced, we were just plain scared. Before the year had passed we had established the bases for true friendships, enriched our minds with basic scientific study, and learned to know our professors as one of us.

Our second year made all of our previous fears and anxieties seem infinitely small. We worked so hard and became so engrossed that we were entered upon our third year of study before we realized it. By this time we had gathered momentum, our foundation had been carefully laid, and our duties as pharmacists were beginning to reveal themselves as something more tangible.

In a very short time we found ourselves standing in the shadow of a magnificent hospital wearing caps and gowns. That was really a day of excitement, and as we marched into Monumental Church for convocation, each of us determined in our hearts to make this an even better year. It has truly been the best year of all, and at times we sicken with the thought of its being our last.

We have advanced over four difficult but intensely interesting and informative years, and we are now on the threshold of capturing all of our previous dreams. We feel that our class is among the first upon which the "new" has been tried. All of the changes and differences in organization have made us very strong, and we can easily adapt ourselves to an ever changing environment. Through the careful guidance of our faculty we are really more able, we believe, to meet the ever-changing and uncertain world than any class that has preceded us.

Junior Class History

In our world today millions of feet are marking time in drill for war, but we as students are marking time by the development of our minds with the hope of being men fitted to relieve suffering and pain.

On we have gone from light-hearted, ambitious and probably timid freshmen to more gallant sophomores until at last by untiring efforts we have reached the third lap of our journey—a Junior. It has not been a path without obstacles and discouragement, but by the untiring and faithful help of our Professors, we are able to grasp a deeper understanding from lectures and laboratory experiments and to continue our journey in pharmacy with uplifted hearts. We know the color of life of the individual; the degree of his happiness in personal life, and even his success in business, depend upon the tilt of the heart. May our vision be so strong as to lift us above all minor difficulties and across the major problems which are a part of daily living.

As individuals may we develop a clearer view of the objectives toward which we strive, and the course to be pursued to attain it—thus fitting us for the last and envied span of our journey at M. C. V.—Oh, to be a senior!

JUNIOR CLASS
SCHOOL of PHARMACY
Sophomore Class History

TWO years ago, in the fall of '39, we, twenty-three ambitious young hopefuls, took the initial step towards preparing ourselves for a career in Pharmacy. The year took its toll, and the opening this year found many of our old, familiar faces absent. Whether these losses were due to academic failures, earthquakes, fires, floods, or other major disasters is unimportant. The fact remains that although the quantity has diminished we are egotistical enough to think that the quality has been improved during the process of elimination.

As we look back for a final glance before assuming the role of "Junior," we recall fleetingly the concrete, tangible events that went to make up our second year—Convocation; Founders Day; dedication of the new hospital; election of Class and Student Body officers; school and fraternity dances and picnics; addition of a fourth floor to McGuire Hall; quizzes, examinations, and the day of final reckoning—yes, all of these will make pleasant memories. But, in the distant future, when we settle back in an easy chair and let our minds wander idly over the years that have fled, it will be not these things so much that we will cherish, but rather the memories of the friendships which were begun in the Freshman year, deepened in the Sophomore, and fully ripened during the final two years.

SOPHOMORE CLASS
SCHOOL of PHARMACY
Freshman Class History

Possessed with animation and already having been inspired, we, as Freshmen, entered the Medical College of Virginia on September 19, 1940, with the idea of becoming parts of the professional world in the field of Pharmacy. An opportunity to attend such an institution as M. C. V. makes us proud, because we are conscious of the immutable reputation that it bears. This widespread reputation acts as a nucleus around which the school is built.

For us this was the beginning of four years flushed with information, taught by gentlemen of high ideals and integrity. There is within M. C. V. an atmosphere of friendliness and cordiality among students as well as the faculty. Every instructor seemed ready and willing to help us “half-scared” Freshmen in every possible way. It was not long before we had oriented ourselves to the type of quizzes given by each instructor; nor did it take the instructors long to let us know what was expected of us. Our success seemed to be their ultimate interest.

We are proud to boast that it was during our Freshman year that the most modern and most beautiful hospital in the country was completed. We attended its dedication with much pride. The magnitude and beauty of it adds much to the attractiveness of Richmond. Its height adds to Richmond’s skyline, and by this great structure our city has become the medical center of the South.

We dare not go through our Freshman year without recognition of the Mortar and Pestle Club. This extra-curricular function gives students an excellent opportunity to associate more freely with one another and thereby become more friendly. We should like also to compliment M. C. V. on its up-to-date library, truly a valuable and integral part of any school.

With three more years ahead of us, we shall continue striving to attain our goal with this thought in mind, “One only attains that which he earnestly strives for.”
FRESHMAN CLASS
SCHOOL of PHARMACY
MISS MARGUERITE GAY NICHOLSON, R.N.

We, the Senior Class of Nursing, dedicate this section of the Annual to one who has been a true friend, advisor and teacher.
Senior Class History

THE day is fast approaching when we hope to become graduate nurses. It seems as though it were only yesterday that we sat in Monumental Church for the first time and listened to the One Hundred and First Convocation Service. Since that time, by degrees, we have become a small part of this eminent group of people who make it their life work to help in the advancement of the health of those about them.

First came the whirl of classes of the probation period, then the uniforms and duty on the floors. We thought that we had learned quite a bit in classes, but our knowledge seemed to have vanished. This was certainly different from classes—why, we didn't even feel like nurses!

The Junior year came and brought with it night duty. Some of the patients were very ill and were depending on us to watch them carefully. They could die in the night so quietly. Now we were beginning to feel like nurses. Many pleasant memories of our student days will linger with us, but none can be more beautiful than those of making rounds on the wards at night and pausing by a window to watch the snow fall quietly or, early in the morning, to have brief glimpses of the glorious rising of the sun. How pleased we were when our nursing care helped: When a high temperature would come down to normal, or when we could watch an unusually sick patient gradually recover.

Now we have arrived at our present status—Seniors—thinking that we have learned much, but we also realize that our dean is right when she tells us that three years in nursing school is a beginning only—that we shall learn much more about nursing after graduation. But in this three year period we have become adjusted to the profession and have become more self-confident. Tasks we once feared to face because we knew so little about them we now perform with courage. We are deeply grateful to those who have so patiently taught us. They have given us a good foundation upon which we may build future knowledge.

Our years at M. C. V. have been happy ones. The social and athletic activities have given us much enjoyment. In these contacts with classmates and other members of the student body, beautiful and lasting friendships have been made. We are delighted to have been here during a period of so much growth and advancement of this school, the time not only of the construction of a great hospital and other improvements of various buildings on the campus, but also the coming of our new dean, Miss Grant, with new plans for nursing education.

It is our hope and desire that we shall ever be loyal to, and continue to grow with, our Alma Mater and be an honor to our profession.

AFTER a year of "Oh's" and "Ah's" at sights which have met our unaccustomed eyes, blunders and professional errors, we, the Junior Class, have arrived at the half-way mark in our work at M. C. V. As pre-clinical students, we longed for the time when we would receive our caps and have a chance to use the knowledge we were accumulating in order to alleviate the suffering of our fellow-man. The days have stretched into months since that night last March when we were capped by Miss Grant, the Dean of Nursing. We immediately assumed our new role with enthusiasm and a determination to obtain the most from our classroom work which, together with our practical experience in the hospital, will enable us to receive our Diploma as a Graduate Nurse, which is our ultimate goal.

However, all of our time at M. C. V. has not been entirely spent on the more serious side of life. Under the leadership of our sponsor, Miss Esther Moyer, and our class president, Miss Barbara Zigler, we have done much not only to entertain and help others, but we have encouraged our own members to develop their peculiar talents and abilities. Many have found their place on the basketball team, bowling, tennis, or dancing. The more musically inclined members are identified with the Glee Club. Still others have found places of leadership in the various church and civic organizations throughout the city.

Not only does the progress which our class has made within the last year come to our attention, but we have seen a mere skeleton of a building grow into a great hospital. It has been a privilege to have a part in launching so great a medical service to the public.

We have come a long way together—not only the Junior Class, but you, my readers. With much enthusiasm we look forward to next year and expect even greater accomplishments. So we adjourn until this time next year when we shall again turn back the pages of time.

JUNIOR CLASS
SCHOOL of NURSING
"LISTEN, my children, and you shall hear"

Of the Pre-Clinical Class that is new this year:
It's forty-four strong—or weak sometimes,
When our test papers show neither reasons nor rhymes.
But important we felt on that December day,
When through the new hospital we led the way,
Discoursing most glibly of fever machines,
Operating rooms, and protective screens;
And though to our tongues the terms were new,
We hope that the things we told were all true;
For the building was opened in triumph, and yet
Not a one of us present was allowed to forget
That its end and its aim was in service to man.
And that ours is the challenge to do what we can
To make it a symbol of hope and of life
In the midst of disaster and sickness and strife.
Among our priorities we also can add
The first Orientation Class—and 'twas not just a fad,
For Miss Moyer and Miss Nicholson, we all will agree,
Did a mighty good job of letting us see
Just what to expect in the days still ahead,
From attending a class to making a bed.

Along with all this we've oriented a dean,
Assistant to Miss Grant—Miss Gilbert we mean.
But she orients us now, for in Psychology I
She shows us how, subtly, suggesting is done,
Whether for class or ward our assignment may be,
Or even feeding patients on Private Hall III.
Fun we have had in Cabaniss Hall,
With reception, kid party, fraternity ball.
Glee club, basketball, and hiking club, too,
Help keep us in trim for the things we must do.
And now we look forward with eager delight
To getting our caps—for that is the height
Of a pre-clinical student's efforts and dreams;
A white crown of triumph, to her, the cap seems.
To Miss Grant, our dean, whose ideals high
Give us precepts to guide us as the years go by,
Devotion we pledge, that her dreams may be,
In our lives and in our school, a reality.
So thanks to teachers and upperclassmen—our friends;
With appreciation for them, this history ends.

The object of the Reserve Officers' Training Corps is to provide systematic training at Civilian Educational Institutions for the purpose of qualifying selected students at such institutions for appointments as Reserve Officers in the military forces of the United States. The Reserve Officers' Training Corps is, therefore, an important agency in making effective the plan of national defense.

The Reserve Officers' Training Corps Course consists of four years' training in Military Science and Tactics and is divided into a Basic Course for the Freshman and Sophomore years and an Advanced Course for the Junior and Senior years.

Enrollment in the Reserve Officers' Training Corps is voluntary, but each enrollment is for two years, made at the beginning of the Freshman and Junior years.

Enrollment for the Basic Course is limited to selected students from the incoming Freshman class who meet the required physical standards.

Selected students who have satisfactorily completed the Basic Course and who agree to attend the six weeks' training camp prescribed by the War Department, may enroll in the Junior year for the Advanced Course.
Graduates of the Senior Class in Medicine who have completed the prescribed course in the Reserve Officers Training Corps and will be commissioned as First Lieutenants, Medical Corps Reserve in the Army of the United States are:

E. B. Agee, Jr.    E. L. Caudill, Jr.    L. C. Hulcher

Honor Medical Society
Established at Medical College
of Virginia December 4, 1940
A non-secret, College Medical Honor
Society, membership to which is based
entirely on scholarship. Organized at the
College of Medicine of the University of
Illinois, Chicago, August 25, 1902, and is
the only order of its kind in medical
schools on this continent. Its definite
mission is to encourage personal honesty
and the spirit of Medical research. It has
replaced the old Brown-Sequard Society
established at M. C. V. in 1931.

Student Activities
A Message from Our Student-President, Fletcher Raiford

Our Student Government seeks to promote college activities and a spirit of good fellowship among the students and faculty. It directs and settles the affairs of the Student Body and works constantly toward making the college greater in every way. Its membership includes all regularly matriculated students and this year totals 657, of which 295 are enrolled in the School of Medicine, 132 in the School of Dentistry, 115 in the School of Pharmacy and 117 in the School of Nursing.

The Student Government has its own Constitution and Honor Code by which it is governed.

Throughout the year the Student Government has planned and conducted dances and social outings. These functions have been well attended and greatly enjoyed by the students.

The Executive Committee has met regularly this year and has handled the affairs of Student Government efficiently. It proposed an amendment to the Constitution dealing with the collection and disbursement of the Student Activity Fee. This amendment was voted on and passed.

The Student Government officers have had several conferences with the faculty and administration to discuss problems relevant to the best interest of the school and Student Body. We thoroughly appreciate their interest and counsel.

The entire Student Body is to be commended for its willing assistance in the formal opening of our new hospital this year.

We believe that one of the greatest assets the Medical College of Virginia can have is an interested and active General Alumni Association. We sincerely hope that each member of the graduating class of 1941 will exert every effort to give their individual support to this important organization.

The 1941 X-RAY

THE co-ordinated efforts of the staff and student body have done much to fulfill the aspects of a complete annual from my viewpoint.

The staff has endeavored to depict the important events and student life at M. C. V., so that they will be a written reminder to the present Senior Class in years to come.

An original and unique motive, design, or feature was indeed a problem. Therefore, I humbly submit my efforts and ideas with the hope that they will prove much to those who glance upon the pages of this 1941 X-RAY.

SKULL & BONES

The school newspaper has endeavored to record and convey to the readers an accurate account of the activities and incidents of interest to the students, and of the progress of the school in increasing the physical facilities.

Many of the familiar features and sections of last year were continued and an effort was made to include as many articles of purely literary value as possible.

The editor wishes to express his appreciation for the able assistance and cooperation of the staff and the business manager, who have conscientiously striven to work together for the production of a weekly publication worthy of M. C. V.

Y. M. C. A.

The central Y. M. C. A. maintains a branch at M. C. V., capably and most efficiently directed by Jonah Larrick. He knows all who have entered our portals and is a friend from first till last.

Jonah L. Larrick

"Jonah" tells the boys all about the game

Activity during lunch hour
An Imperishable Record of the Past, an Exploitation of the Present, A Solemn Pledge for the Future

FOR every living student, or graduate of M. C. V., for each existing organization or institution—in short, for every "going concern" there are three tenses: There is the Future, as well as the Present and the Past. And in the case of every creative idea the final test of value is the relative permanency of its potential service to humanity. For any truly great institution there is no such thing as "having arrived," so to speak; always there is a further duty to perform, another height to climb, a more exalted service to render, a loftier niche in the Temple of Fame to achieve. In those inspiring lines of "The Present Crisis," slightly paraphrased:

"New occasions bring new duties. 
Time makes ancient good uncouth; 
We must upward, still, and onward, 
Who would keep abreast of Truth! 
Lo! before us gleam her watchfires, 
We ourselves must Pilgrims be— 
Launch our Mayflower, and steer boldly 
Through the desperate wintry sea, 
Nor attempt the Future's portal 
With the Past's time-rusted key!"
The REVELERS

A UNIQUE GROUP for student diversion within our curriculum, composed of the students from the four schools. Its activity as a glee club has offered many entertaining occasions through the years, which have been greatly enjoyed by all who have had the pleasure of listening to them.
The Medical College of Virginia Orchestra

The Orchestral Quartet offers an entertaining and original bit of syncopation during intermission.
Haven't You Heard? An Inguinal Tragedy

The Chemistry of a Kiss

Taken from Journal of Chemical Education, Vol. 6, 1924

The kiss was discovered by the old alchemist named Isiah during his research on an apple. He was assisted in this important work by Eve to whom much credit for the discovery is due. Kisses have long been known to the chemist as potassium thioiodide, having the formula KIS3. The kiss may be reproduced synthetically, but the natural is the more widely used. It may be found in the free state in parks, automobiles, parrots, parks, and similar places. Its occurrence in the combined state is rare except in certain locations where it is found in combination with divorce proceedings and the like.

Physical Properties

KIS is slightly reactive to metals in the iron group but has very strong affinity for the so-called noble metals, particularly gold and platinum, with which it reacts to form an insoluble complex with the liberation of a great deal of hot air. For example, if one part by weight of KIS is added to one part by weight of gold or platinum, in form of a ring to which one-fourth carat of diamonds has previously been added, a violent reaction takes place which may result in a breach of promise after the reaction has subsided if cooled too rapidly.

Chemical Properties

It is insoluble in water, readily soluble in alcohol, cosmetics, and organic solvents. If it is dissolved in cosmetic solution and then evaporated to dryness, an amorphous residue is left which, when examined under a microscope, appears in the form of elliptical particles. It is exceedingly sensitive to light, especially moonlight.

Uses

KIS, because of its peculiar chemical as well as physical properties, finds varied uses in the arts, especially in the art of love-making. Little is known of the properties of this substance, but many heads are now at work on the problem.

This is Deep

"Mr. Do you know Hortense is fond of Kipling?"

"If she had a date with Hortense last night? Oh, is that what she calls it?"

Dramatis Personae

Queen Henrietta

The King of Ilium

Cardinal Symptoms

Poly Orea

Scene: The Right Lower Quadrant

Time: The Proper

(The Omentum rises, disclosing Queen Henrietta, disguised in a Prince's Robe and a Sunbonnet, seated upon a stool. Another Horns are heard.)

(Enter the King of Ilium wearing the Royal Headpiece, with the Ambassador from Gastrica.)

"I have brought many gifts of food from Dukk Esophagus, hoping that we can come to peace."

"Belching from trumpets in a gastric pit are heard."

"The King: That will be well received at my visit."

"The Ambassador: Gastric contractions are heard from tubes hypochondriac region."

The Queen: How earnest thou here?

The King: Yes, I have been feeding the dogs in their hiding in the crypt."

The Queen: Thou liest! When Polly Orea was feeding the dogs I saw their hiding in the crypt."

(To the King.)

"The King: Yes, at the palace."

The Queen: Ah! Thou art the King!"

The King: Yes, every inch a king! Seizing a spurious cord he strangulates her, tying a Gimpernet. As he sloughs away, she breaks down and ulcerates. Cardinal Symptoms rushes in and reads a Blue Mass. Silence from surrounding cells and organs.

(Omentum falls.)

Boy or Girl

Early on a foggy October morning, a nice time for the stork to approach without being recognized too easily, I was called to a country home. On arrival I found that two neighboring women and the baby had preceded me. As I hurried in to see the mother, one of the women said, "It's a boy, Doc. You know, I'm not in the house five minutes before I know what it is." Just then the other woman, who was dressing the baby, said, "No, I'm not in the house five minutes before I know what it is." (Continued on page 150)
HARVEY HAAG DAY
(Continued from 145)

Right here I hasten to explain, though the above may seem
insane:
I beg you don't become Psychological—
Paralytic's only a Mild Hypnotic.
A drug producing normal sleep—
So would Harvey, 'cept we keep
Awake to hear his famous wit.
And laugh as though our sides
would split.
At Schneiderberg's Archite, Ole
Doctor Long,
Of Ether fame, then we move
along
to Humphrey Davis, whose
Laughing Gas
Must float around in Harvey's class.
Ole Doctor Straub, of Morphine fame,
Who taught the rats to start his name
By curling their tails to form the "S"
In his famous Straub-Morphine Test.
Cathartics, Bitters, Phenol, Zinc,
The whole class roars, then stops
to think;
Chloral Hydrate or "Knock-out
Drop?"
On Harvey drones and never
stops.
But we don't mind, not on this day,
For Harvey doesn't, "we're happy
to say;
Pull out his roll book, make no
bones
As he scans the names—says,
"Miss—ter Jones."—By "Brix."

DIET AND PREGNANCY

A middle-aged negro woman came
into the clinic to be examined
for possible pregnancy. She
was told that she was not preg-
nant, that pregnancy for her was
impossible, and that if she ever
became pregnant it would be a
miracle.
Upon returning to her anxious
husband in the waiting room, he
immediately asked, "What de
doctor say, honey?"
She replied, "He say if I is
pregnant it is a mackerel, you
lab-eating devil, you!"

THE POSITIVE WASSERMAN
or
Blue Blood's Latest Fad

One Plus, two Plus,
Plasses all around;
Three Plus, four Plus,
Spirochetes abound.
One, two, three, four—
Read 'em and weep;
You only have to get 'em once,
And you got 'em to keep.
Four little numbers
All in a row,
Dressed up and lonesome.
And no place to go.
This little Plus
From ashly little Maid,
Just her receipt.
For the price that you paid.
These last little numbers,
So lonely and blue,
Eager and waiting.
Just pining for you,
Sweet little Plus girls,
So bashful, so shy.
Surely you'll meet them
Long e'er you die.
In the face of the young
And in the eyes of the old,
Immortal—unusual.
In clay and in gold.
Staunch little Plasses
Wherever you look,
In castles, on throne,
And in places forsaken.
Always you'll see them,
In Churches, in Schools.
In Congress, in Senate,
In wise men, in fools.
Everywhere Plasses,
Number galore;
Always men have them,
Ever seeking for more.

Wife: You are, I presume, my
husband's secretary.
Secretary: Why, yes, that is
what I was hired for.
Wife: Take a letter.
Secretary: I'm sorry; I don't
know shorthand.
Wife: Well, type it out.
Secretary: I'm sorry, but I
can't type.
Wife: Well, what did my hus-
band hire you for?
Secretary: I'm sorry, madam,
I can't conceive.
THE CHEMICAL NATURE OF WOMAN

This element called woman is a member of the human family. It has been assigned the chemical symbol We, accepted atomic weight is 120, although a number of isotopes have been identified having weights from 95-460.

Occurrence
It is abundant in nature, found in both free and combined state, usually associated with men. That found in the U.S. is preferred.

Chemical Properties
A transparency, hardness, color and boiling and melting point vary within wide limits. The color exhibited by many specimens is a surface phenomenon and is usually due to a more or less closely adhering powder. It has been found that an unpolished specimen tends to turn green in the presence of a polished one. The boiling point for some varieties is quite low, while others are likely to freeze at any moment. All varieties melt under proper treatment. The taste varies from a pungent to very bitter, depending upon environment and treatment.

Physical Properties
Absorbs without dissolving, in a number of liquids, the activity being greatly increased by alcohol. Absorbs seemingly unlimited quantities of expensive foods.

Many natural occurring varieties of We are highly magnetic; in general the magnetism varies inversely with the density and size, and directly with the square of the valence, inversely with the cube of the age. All varieties exhibit great affinity for gold, silver and platinum and precious stones in both chain and ring structures. The valence toward these substances is high and is complicated by the fact that the residual valence is never satisfied. Many stable and unstable unions have been described—take, for example, the diye press. Some varieties, being highly explosive, are dangerous in inexperienced hands. In general they tend to explode spontaneously when left alone temporarily by men.

Uses
Highly ornamental. Wide application in arts and domestic science. Acts as a positive and negative catalyst in the production of fever, as the case may be. Useful as a tonic in alleviation of sickness, low spirits, etc. Efficient as a cleaning agent. Equalizes the distribution of wealth, probably the most powerful (income) reducing agent known.

A visitor in the hospital asked a student nurse to direct him to the "Gent's Room." Curiously she looked at him and asked, "What is the gent's name, please?"

NOTT-SHORT

A duel was lately fought in Texas by Alexander Shott and John S. Nott. Nott was shot and Shott was not. Hence, it was in this case better to be Shott than Nott.

There was a rumor that Nott was not shot, and Shott avers that he shot Nott, which proves either that Nott was shot, notwithstanding.

Circumstantial evidence is not always good. It may be made to appear on trial that the shot Shott shot shot Nott, or as accidents with firearms are frequent, it may be possible that the shot Shott shot, shot Shott himself. Then the whole affair would resolve itself in its original elements, and Shott would be shot, and Nott would not be shot. We think, however, that the shot Shott shot shot not Shott, but Nott; anyway, it's hard to tell who was shot and who not. Maybe both Nott and Shott were half-shot to begin with.

—Richmond Collegian.

NOTE: You say baby's name is Opium? What an old name! You know opium is a product of the wild poppy, don't you?

Mary: "Yes, if you evah wer a child you could have a wild poppy, she's got one!"

"How many students are there at the pharmacy college?"

"Oh, about one in ten."

A doctor telephoned the hospital about his patient and was answered by a student nurse.

"Has my patient had any hallucinations?" the doctor inquired.

"I don't know for certain," replied the nurse, "but she surely had them. Did you order them?"

On completing a lecture on obstetrics to student nurses, a doctor gave an examination. This was one of the questions: "Give some positive signs of pregnancy."

One of the answers amused him very much. It read: "One of the signs of pregnancy is as far-away look in her eye."

"Why don't you get me a baby brother to play with?" asked ten-year-old Martin of his mother.

"I have had all my insides taken out," explained the broad-minded parent.

"Oh, good!" cried her son.

"Then you must have room for twins!"

The drug counter clerk was surprised when a professor asked: "Can you supply me with some tablets of monoactic acid of salicylic acid?"

"Oh, you mean aspirin!" said the clerk.

That's it, that's it! I never can remember that name," replied the professor.
“IS THIS PRODUCT COUNCIL-ACCEPTED?”

This is the first question many physicians ask the detail man, when a new product is presented.

If the detail man answers, “No,” the doctor saves time by saying, “Come around again when the Council accepts your product.”

If the detail man answers, “Yes,” the doctor knows that the composition of the product has been carefully verified, and that members of the Council have scrutinized the label, weighed the evidence, checked the claims, and agreed that the product merits the confidence of the physician. The doctor can ask his own questions, and make his own decision about using the product, but not only has he saved himself a vast amount of time but he has derived the benefit of a fearless, expert, fact-finding body whose sole purpose is to protect him and his patient.

No one physician, even if he were qualified, could afford to devote so much time and study to every new product. His Council renders this service for him, freely. Nowhere else in the world is there a group that performs the functions so ably served by the Council on Pharmacy and Chemistry and the Council on Foods.

Mead Johnson & Company cooperates with both Councils, not because we have to but because we want to. Our detail men can always answer: “Yes, this Mead Product is Council-Accepted.”
THE RAVING
By Tom Smith
(With apologies to E. A. Poe and others from whom this was adapted)

Once upon a morning weary
I was feeling somewhat bleary.
Bleary, yes, but no so bleary
As I have often felt before.
As I combed my aurum toupee,
Suddenly I heard a whooppee,
Some hoarse rend remarking
"Whooppee!

Just outside my bathroom door.
Some disgusting inebriate seeking
Entrance to my bathroom door;
A drunk it is and nothing more.

As I swayed in oewish napping,
Suddenly there came a tapping
As of someone gently rapping.
Beseeching entrance to my bath-
room door.
In the pipes there came a droning
Like some departed soul a-mourning;
The only word its voice could utter.
First a symphony and now a matter.
The melancholy word, "Lenore."
Just a gurgle in the plumbing,
Giving back the name Lenore.

Who can this brazen inebriate be
That comes a-calling at half-past three?
What manner of impolite boar is he,
Disturbing me out of tran-
quility?
Let me see then, what the heck,
And then this mystery explore;
Let me have then one more drink,
And then this mystery explore.
One Scotch I had, no more.

Open then I flung the transom,
When with naughty mien and handsome
In stepped a stately Raven,
Dressed in seats and pinacole.
Close behind him, walking slowly,
Came three lizards, reserved and holy,
And perched upon the busted light bulb.
Just above my bathroom door,
Perched and sat and nothing more.

Then some elephants wearing glasses
Entered sedately, singing masses.
Or perhaps it was the Prologue
From the opera "II Trovatore."
Then to my profound amaze-
ment
Hooked their trunks over the doorway casement,
And climbed upon the basted light bulb.
Just above my bathroom door,
Just a crowd and nothing more.

After that I don’t remember—
Perhaps it was in September
Or some November a year or two before.
'Twas in Memorial when I came to;
I was strapped and chained; a bell-drew
Poured down my throat the whole
My name was held by Nurse Lenore.
Ah! What a face and what a figure
Had that strong-armed Nurse Lenore!
Oh, what a honey, that Nurse Lenore!

—

Willie, aged ten, complained
Of a severe toothache. "Which
tooth is it?" asked the D. D. S. With
a quick motion toward his mouth, he replied, "Third one
in the balcony."

—

BOY OR GIRL
(Continued from 145)

called out, 'Doctor, it is not a boy, it’s a girl.’ "Oh!" said the first woman, "When I reached under the covers I must have gotten hold of the cord.”

—

THIS IS NO BULL
I remember the first time I tried it.
I was only a kid of fifteen.
And even though she was much younger than I.
She was far more composed and serene.
I was eager, yet awkwardly backward;
Uncertain of how to proceed;
But she seemed not to notice the hesitancy
With which I prepared for the deed.
It was out in the barn, I remember.
At the close of a lush summer day
And the evening was scented with clover in bloom.
And the fragrance of freshly mown hay.
I remember I spoke to her softly,
As I cuddled her face in my hands.
And I saw in the depths of her wild eyes the look
Of a loved one who understands.
I remember she moved a bit closer,
And the touch of her body was warm.
As my fingers moved awkwardly over her throat,
While she nestled her head on my arm.
Looking back on it now, I remember
How I stood while my head seemed to swim

With the thought of the thing I was going to do,
Yet reluctant somehow to begin.
And her eyes seemed, I thought,
to rebuke me
For waiting for being afraid;
And even old Nellie, our plow-
horse,
Looked over her manger and neighed.
Long later I stood up uncertain
Of whether to stay or to run;
A tingle of pride, and yet shaken
and awed,
For I knew that at last it was done.
I remember it seemed hours later
How my heart hammered under my blouse
With the joy of a boy that’s turned to a man.
As I made my way to the house.
Twenty years have gone by
Since that evening.
But I’ve never forgotten, I vow,
The thrill of the joy that I felt
As the day that I first milked a cow!

—

Girl’s voice: Don’t unbutton that!
(Silence.)
Girl’s voice: Please don’t take that off.
(Silence.)
Girl’s voice: Does that have to come off too?
(Silence.)
Girl’s voice: Stop! You’re hurting me.
Mother’s voice: Stop your fussing, you’re soaking wet and if I don’t get these clothes off you, you’ll catch your death of pneumonia!

—

REPARTEE

Customer: I’d like some ant powder.
Clerk: Would you like the large size at 29 cents?
Customer: No.
Clerk: Well, would you like the small 25-cent size?
Customer: No-0-0.
Clerk: Why don’t you just step on them?

On being advised that she was pregnant Mrs. W. smiled bravely and said, “It’s not that I object to having a baby Doctor; it’s just that I hate to see my figure go to seed.”

In taking the history of a colored woman, we got down to some of the less important facts, and finally asked, “How many children have you?” The colored man replied, “Well, I’ll tell you, Doctor, there ain’t nothing running ‘round my yard but a fence.”

In the French-speaking section of Louisiana, an American M. D. was taking a case history on a patient, and the first question was: “Do you have any trouble with your menses?” The patient blushed and answered, “No.” The next question was, “When did you menstruate last?” At this she burned a scarlet hue, looked meekly at her husband who was sitting opposite her, as if affirmation, and answered in a low tone, much embarrassed, “Sunday night.”

Some time ago I got this amusing telephone call. “Doctor, please come and see my husband. It’s his head. He has it off and on all afternoon, and he sits with it in his hands on his knees in deep pain. Come as soon as possible.”

Pref: How does the bony pelvis of the female differ from that of the male?
Student: It’s a lot prettier, Doctor.

Announces

the FIRST...the ONLY

COMPLETELY ELECTRIFIED

BOOKKEEPING MACHINE
with Automatic Balances!

Here is electricity in the most advanced form ever applied to a bookkeeping machine...not merely to drive a mechanism, but as an operating force in its own right — setting new records for speed and flexibility. This newest Remington Rand Bookkeeping Machine, like its thousands of predecessors today serving the leading hospitals of the country, is dedicated to one big job: to help cut your bookkeeping costs. Use this one machine for patients' accounts receivable, inventory control, accounts payable, payroll. The ideal machine for every accounting application in modern hospitals!

Here's what YOU stand to gain when you use this amazing new Remington 285

1. Completely electrified numeral keys, alphabet keys, carriage, other operating features... higher daily production with far less fatigue... uniform, clear records at the slightest touch of the keys.

2. Complete flexibility of registers... giving you extra accumulations or quick change in capacity without rebuilding or replacing machine.

3. All registers, vertical and cross-computing, equipped with direct subtraction and visible at all times... instant corrections and an instant audit.

4. Complete visibility of all recorded information.

5. Fully automatic balance computing and printing — debit or credit, sub or full... electrically, by solenoids... gives you greater speed, greater flexibility on all accounting applications.

Every branch office is now equipped to show you this amazing combination of electricity and mechanics. Don't buy any bookkeeping machine until you've seen the Remington 285. Phone for your demonstration today!

Girl Customer: Does this lipstick come off easily?
Drug Clerk: Not if you put up a good fight.

"Father, what is a counterirritant?"
"A counterirritant," answered the pharmacist, "is a person who shops all day and doesn't buy anything."

Compliments of

A FRIEND

They were born of twin fathers
and mothers,
And they were twins when they
were wed.
Now they've got twin baby-buggies,
For they forgot to get twin beds.

"Move your hand, Bob."
"Aw, Margy!"
"Move it, I said."
"Why?"
"Because, if you don't, the cards will all blow off the table."

MILK...

"THERE should be more competition and more recognition given to the per capita consumption of milk in communities," urges Dr. John L. Rice of New York City. "High milk consumption is as important a factor in community health as many other things to which great attention is given."

Congratulations and best wishes in the practice of your high and noble profession.

WEBER EQUIPMENT
The Dental Equipment of Dignity and High Utility Value

Forty-one years ago, the Founder of our Company invented and originated the Fountain Water Spittoon, and later developed the first combination of unit equipment ever introduced for use by the dental profession.

The policy of the Weber Company has always been that of constructive advancement and fair price maintenance. No greater value is to be found in dental equipment than is found in the Weber line of today.

The following services are at the command of all dental students, free of charge:

Office Planning and Office Decorating
Location Analysis
Practice Counseling
Individual Helps and Instructions

A complete set of ten Counseling Brochures supplied each purchaser of Weber Equipment, delivered each month during the first year, when most needed. All equipment sold on liberal terms and endorsed by first line dealers everywhere. Don't be satisfied until you have inspected the complete line Weber has to offer.

VIRGINIA ENGRAVING COMPANY

101 GOVERNOR STREET, RICHMOND, VIRGINIA
A College Annual requires the undivided interest and attention of Editor, Business Manager and Publisher if it is to present that much desired appearance of Character.

For that reason, Everett Waddey Company handles only a limited number of annuals each year—a limited number so as to permit proper service.

Everett Waddey Company of Richmond, Virginia, alone was responsible to the Staff of the X-RAY for 1941 for the correct manufacture of the X-RAY.
In Appreciation

Mr. Ford, Virginia Engraving Company
Mr. Beale, Treasurer M. C. V. Board of Publications
Mr. Nash, Everett Waddey Company
